

# Attestation

**EVO 3.0**

supplied by

**UNIFIX SWG S.r.l.**

The sample of chemical anchor was supplied to Eurofins the 1<sup>st</sup> of February 2023. The product was tested for VOC emissions according to the requirements of the French legislation (order of April 2011) concerning the labeling of construction products or coverings of walls or floors and paint and varnishes on their emissions of volatiles pollutants. The sample was supplied as being representative of the manufactured product, and it has been tested in accordance with the relevant ISO 16000 (see test report no. 392-2023-00043203\_A\_EN).

**In accordance with legislative requirements, the test results can be summarized as follows:**

\*Information sur le niveau d'émission de substances volatiles dans l'air intérieur, présentant un risque de toxicité par inhalation, sur une échelle de classe allant de A+ (très faibles émissions) à C (fortes émissions).

The product was assigned a VOC emission class without taking into account the measurement uncertainty associated with the result. As specified in French Decree no. 2011-321 of March 23, 2011, correct assignment of the VOC emission class is the sole responsibility of the party responsible for distribution of the product in the French market.
